netcash<sup>®</sup>

## Integrated Debit Order collection for Xero Accounting

Billdozer is a member of the Xero partner program and is the first software in South Africa able to collect Netcash debit orders directly from Xero invoices. You can now debit your customer accounts automatically in accordance with their electronic mandates. Billdozer can also push payment information back into Xero Accounting - another first for third party software integration with Xero!

### Our out-of-the-box, online recurring billing system gives you all this:

- Automatically pull invoices directly from Xero into Billdozer
- Electronic mandates for convenient debit order sign up for customers
- Secure storage of banking information and a credit card vault
- Bank account validation and verification
- Automatic creation of debit order batches by invoice due date
- Send same-day and two-day batches to Netcash
- Email and SMS notification of failed payments
- Re-collect failed transactions
- Reconcile collections in Xero
- Excellent rates for debit orders

" Billdozer has changed my working life. It is such a relief to just put a prefix on an invoice, versus finding out which client owes what and having to create an excel sheet. Billdozer saves me at least a full 8 hour day, which is a lot when one is busy. "

- Benita Sher, Finance Manager at Solid Systems
